Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Demar et al (US # 5,496,972) in view of Salini (US # 5,434,367). Demar et al disclose a removable platform for a postal scale that has two hinged members (26,27). Demar discloses the claimed invention except for the plurality of legs. However Salini disclose that it is known to attach a removable scale platter cover to the scale pan with magnetic legs (240; this feature is useful for a universal scale cover when the size of the scale platter that the pan is intended to be used for is unknown. It would have been obvious to modify the device of Demar to include magnetic legs as suggested by Salini to enable the removable scale pan cover to fit any generic postal scale with any size pan.

3. Claims 11-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Demar et al (US # 5,496,972) in view of Salini (US # 5,434,367) as applied to claims 1-10 above, and further in view of Baker (US # 5,001,648). The aforementioned combination discloses a scale pan cover for a postal scale with the two hinged members and the plurality of legs. However, the aforementioned combination does not

Art Unit: 2841

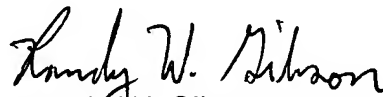

specify that it is intended to be coupled to any particular type of postal scale. However the reference to Baker discloses that the type of postal scale mentioned in these claims is well known; it would have been obvious to use the postal scale pan cover of Demar as modified, with the postal weighing scale of Baker motivated by it's known suitability for it's intended use.
